Joe Taylor
208 S. Farmer
Crosbyton, Texas 79322

Dear Joe,

This letter is written to confirm that at my initial meeting with Dana Forbes in May of 2000 I recommended you to him as the professional answer to handle his dinosaur bones. He had contacted me on regarding the excavation, preparation or sale of the bones at that time.

He then took me (along with surveyor David Babbit) to see the bones on his property. While discussing the disposition of the bones, I told him that "Joe Taylor had the expertise to excavate and prep the fossils professionally." Additionally I told him you had the connections to market the bones, once they were "prepped." I specifically mentioned that you had connections with the Japanese market.

This letter confirms my confidence in your professional ability. This confidence is readily related to anyone discussing work with fossils.

Continue in your valued work.

Sincerely,

Carl E. Baugh
